

CENTRIFUGAL FANS

EBB-100 Series

The EBB extractor fans are suitable for many domestic and commercial ventilation applications where higher system resistance pressures are encountered. The EBB models incorporate powerful forward curved centrifugal impeller with single phase 230V-50Hz, 4-pole (EBB-175) or 2-pole motor (EBB-250).

EBB-175 S and EBB-250 S: Standard models.
EBB-175 T and EBB-250 T: Models with adjustable run-on-timer.

Back draft shutter

The EBB are fitted with an automatic back draft shutter to prevent air entry and limit heat leakage when the extractor is not operating

Forward curved centrifugal impeller

To deliver high airflow performances with a minimum of noise generation against high static pressure system resistance

Examples of installation

Extract ventilation through the wall or ceiling

Duct extract ventilation

Shunt duct extract ventilation system

Double wall or telescopic duct extract ventilation

Surface
